Reviewer

Answer to the Reviewer to his observations in the framework of the review of the
doctoral dissertation submitted with the title

*Economic analysis of the horse sector and relevant topics for its sustainable
development in the Equestrian Revolution*

Keszthely, August, 20. 2016

Dear Mr. Professor,

Thank you very much for the review of my doctoral (PhD) dissertation and your views formulated briefly but, covering all necessary details. I am grateful for your highly affirmative attitude toward the topic. I thank you for your report made by much dedication of time and effort which is highly appreciated and valuable to me. Besides that, it permits me to present the research and to defend the dissertation in the framework of the public defense.

I am pleased that my work is considered as original and novel and one that represents remarkable knowledge and an important contribution to the horse sector. Not only the ideas and concepts of the work are felt to be agreed with but the method for achieving the set objectives as well as the results and the conclusions are also regarded as commendable. Questions concerning the publications are highlighted in a positive way. Thank you very much for your acknowledgement that is present in all details of your report.

As far as the updates of the references are concerned, I can agree with you. In fact, much time is spent from the date, when the final version of the dissertation is prepared and submitted until it is evaluated and defended. Thank you for drawing my attention to the updates of the references which will definitely be very useful in elaborating further scientific publications.

I thank you for making emphases to the most important messages of the work that are the synergetic relationships between the horse sector and the economy as an economic contribution to the national level economic performance and between the economy and the horse sector as a social and economic contribution to the horse sector expressed in the (possibility of) evolution of immaterial needs.

I thank you again your efforts you dedicated to me and the report you made. They are highly appreciated.

Yours sincerely,

Zsuzsanna Mihók
