Reply to the referee report of

Dr. András Majdik

Firstly, I am thanking the reviewer for his second thorough review. I would like to thank him for the good summary of the contents of my dissertation and theses, and his acceptance of all of my previous answers and adjustments.

I want to inform the reviewer that I have already extended the work described in **Thesis 3** (as proposed mentioned in the second review) with active vision and I already have good initial results about active object retrieval using Hidden Markov Models I am planning to show these results in the final defense and I am to publish it in a journal.

Finally, I would like to thank the reviewer for his recommendation about the public defense and his agreement to award me the PhD degree.
