

## **Response to Dr. Judit Baranyiné Kóczy**

I would like to sincerely thank Dr. Baranyiné Kóczy for her thorough and constructive review of my dissertation, as well as for the valuable feedback she provided during the mock defense. I am especially grateful that she acknowledged the revisions made to the conceptual foundations, methodological design, and overall structure of the dissertation.

Her earlier comments contributed greatly to the development of the current version of this work. I particularly appreciate her recognition of the stronger integration between cultural schemas and the analytical tools, as well as the refinements in the labeling and categorization of schemas in the findings chapters.

I also wish to acknowledge her comment regarding the treatment of “*Societal Norms*” as a role schema, since it indeed reflects appropriate behavioral forms. I will incorporate this point to further improve the consistency of the framework.

I am honored by her assessment that the dissertation makes a significant scholarly contribution and by her recommendation for the public defense.
