

I would like to express my sincere gratitude to Dr. habil. Domonkosi Ágnes for the careful reading of my dissertation and for the highly thoughtful and encouraging evaluation of my work. I deeply appreciate the recognition of the originality, methodological rigor, and theoretical contribution of this study.

I am particularly grateful for the acknowledgment of the dissertation's originality and focus on the unique Arabic–English–Hungarian multilingual context and its contribution to expanding research in multilingual pragmatics. Prof. Agnes's recognition of the study's attempt to address the sociolinguistic and cultural dimensions of pragmatic competence is highly appreciated.

I also sincerely value the reviewer's positive assessment of the methodological framework, especially the integration of the Discourse Completion Task and the Multicultural Personality Questionnaire to examine the relationship between pragmalinguistic behavior and individual multicultural traits. The recognition of the distinction identified between bilingual and trilingual communicative profiles is deeply encouraging and confirms the central objectives of the research.

Furthermore, I am especially honored by the reviewer's recognition of the theoretical implications of the dissertation and the thoughtful consideration of the proposed "Scalpel Model" and its contribution to understanding selective multilingual pragmatic resource use. I deeply appreciate the acknowledgment of the study's additive value and its potential contribution to future research in multilingual pragmatics and intercultural communication.

Finally, I would like to express my deepest appreciation for the Prof. Agnes's exceptionally generous recommendation and supportive remarks regarding the scholarly quality of the dissertation and my development as an independent researcher. I am sincerely honored by the recommendation that the degree of Doctor of Philosophy be conferred with *summa cum laude* distinction.

Respectfully,
Ibrahim Rawshdeh
